Proposal Submitted to: City of Frontenac

Date: 03/30/2023

Job: 2023 Pavement Repair Bid

PROPOSAL

We hereby submit specifications and estimate for: Asphalt Pavement Repairs

INCLUSIONS

- Par attached City of Frontenac specifications and locations.
- Mill areas to a depth of 4 inches.
- Sweep and clean patch area.
- Prime patch area with SS-1 tack.
- Lay BP-1 hot mix asphalt and compact with vibratory rollers to proper compaction.
- All patch area edges to be sealed with tack/Trap sand.
- Includes one mobilization, equipment, and labor to complete job.
- Includes necessary traffic control for a safe environment including signage, trimlines, and flagging. All spoils to be disposed of properly.
- Performance Bond and Insurance to be provided. E-Verify Enclosed.

Total to Complete: 1083.22 SY @ \$97.64 = \$105,765.00

If base hi early concrete is required (8”) with 2” asphalt overlay our unit price is \$47.00 per SF. Once size of area(s) is known the unit price can be negotiated.

Payment to be made per contract signed by City of Frontenac and Spencer Contracting

All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. This proposal subject to acceptance within 60 days and is void thereafter at the option of the undersigned.

Signatures Required for Acceptance of Proposal:

The above prices, specifications and conditions are satisfactory and are hereby accepted. Spencer Contracting Company is authorized to do the work as specified. Payment will be made as outlined above.

All,

Street patching is considered to be milling and paving.

Base repair dig-out. Understanding each case is different, applications may differ. Confer with Director

Base concrete can be rapid cure high strength concrete, topped with asphalt pavement.

Base asphalt Type X no more than 5-inch compacted lifts, with proper cool down time, topped with 4 inches of BP1 surface Hot Mix.

4" inch milling removal minimum.

Sweep and clean patch area.

Prime patch area with SS1 (Completely Tack Base area and Vertical Edges to pavement surface).

Utilizing BP1 asphalt mix patch and compact with vibratory roller and plate compactor to proper compaction.

All patch area edges are to be sealed, Broom in place SS1 with smooth Trap Rock sand coating is preferred.

All locations will require proper road work signage, two (2) flagmen at all times,

Complete sweeping and cleanup of area,

Removal of all waste and debris to proper disposal.

For planning purposes were requiring the work to be completed within the first 3 weeks of August.

This is a prevailing wage project and wage reports will be required.

The successful bidder will be responsible for supplying a project performance bond and, insurance, along with E Verify information.

Thank you in advance.
